Risk

Agrello provides its users a platform for binding smart contracts with legal contracts. The project provides services including identity verification, building contract and contract templates, API for 3rd parties, etc. The team is rich in legal experience, however their technical backgrounds are quite ordinary. The project's development progress is currently behind schedule. No strong external support, such as investors, advisors, or partners, are shown according to public information. Additionally, the details of project implementation are not quite clear.

Summary

Team

CEO, Hando Rand

- 2016 - Present: CEO and Co-Founder of Agrello
- 2016 - 2017: Legal Scholar at Tallinn University of Technology
- 2013 - 2016: Bachelor Degree in International and Comparative Law, Tallinna Tehnikaülikool

Chairman of Technology, Anton Vedeshin

- 2012 - Present: CTO at 3DPrinterOS
- 2013 - Present: Visiting Lecturer at Tallinn University of Technology
- 2005 - 2012: CTO at Innovative Technologies Business Systems
- 2010 - 2017: Ph.D. in Cloud Computing, 3D Printing and Cyber Security, Tallinn University of Technology

Project

Agrello Platform

The Agrello Platform is a dashboard where users can manage their identity, create contracts, and sign contracts using Agrello's legally binding signature, and have an overview of all of their agreements. However, these functionalities are currently under development and testing.

DELTA Token

DELTA is the digital token issued by the Agrello project. DELTA tokens are compatible with the ERC-20 standard, which allows both contracts and wallets on the Ethereum blockchain to interact with the Agrello protocol. The DELTA token is the native token for all of the network services that require an interaction, both for template and contract developers, as well as for users of the protocol.

Ecosystem

Market Cap: \$ 3,271,712

Ranking: 603

Apps on Google Play The Agrello project has launched two Apps on Google Play. Both Apps, Agrello ID and KYC for Agrello applications are currently not very popular, with a combined download number of less than two thousand.

AAA: The technical foundation is extremely solid and project risk is extremely low.

AA: The technical foundation is very solid and project risk is very low.

A: The technical foundation is solid and project risk is relatively low.

BBB: Technical feasibility is very good and project risk is controllable.

BB: Technical feasibility is good and the risk of the project is moderately controllable.

B: Technical feasibility is moderate and project risk is limited to a controllable extent.

CCC: The technical foundation or idea has certain problems and the project has relatively large risks.

CC: The technical foundation or idea has considerable problems and the project carries large risks.

C: The technical foundation or idea has substantial problems and the project suffers from extremely large risks.

D: The project is riddled with problems and carries an extremely high risk of failure.
